

Sepahan Battery Industrial Complex (SBIC)

SEPAHAN BATTERY
ENERGY FOR LIFE

Was founded in 1999 as the most hi-tech enterprise in automotive battery manufacturing in Iran. It is located at Oshtorjan industrial zone, Isfahan, Iran, and occupying a total land area of 65,000 m² with an investment in excess of 60 million USD. SBIC's annual production capacity is 5 million batteries, and it is planned to be increased further by introduction of a number of capacity alignment activities.

The manufacturing equipment are mostly fully automated and are made by the most renowned European battery manufacturing equipment suppliers, such as Digatron, Sovema, TBS, BM, La Pneumatica, etc. Usage of state-of-the-art equipment and first-class raw material has enabled SBIC to produce the highest quality lead acid batteries for automotive applications to European, Japanese and North American standards. SBIC is equipped to produce enough battery plates, lead oxide, distilled water and diluted sulfuric acid to support annual production of batteries. SBIC has also tooled enough plastic injection molding capacity to support approximately one hundred percent of its production needs without relying on any external sources. Over the last 20 years, highly skilled engineers at SBIC have developed technical capabilities to be able to design and manufacture all types of batteries for OEM and after-market applications. SBIC's battery products include maintenance free (sealed), Euro-Kamina and Japanese N types for passenger cars and heavy duty vehicles in B20, B24, D23, D26, D31, G51, H51, E41, L1, L2, L3, L5, B, C from 35AH to 220AH capacity and also EFB batteries which are used for cars with start-stop technology.
